Harish Chintala

Bengaluru, KA | harishchintaladev@gmail.com | +91 7893611993 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Engineer (SDE/SDET) with 5+ years of experience in full-stack development, test automation architecture. Skilled in designing scalable backend APIs, web applications, and robust automation frameworks across web, mobile, and connected platforms. Experienced in integrating CI/CD pipelines, using AI-assisted development and testing tools, and developing MCPs and RAG systems for automated workflows. Backed 3 years of prior mechanical QA experience and deep insights into end-to-end hardware-software reliability.

SKILLS

- Programming Languages: Python, JavaScript, TypeScript, Java
- Frontend Development: React, Next.js, HTML5, CSS3
- Backend Development: Django, FastAPI, Spring Boot, Node.js
- Automation Testing: Playwright, Selenium, Cypress, Appium, TestNG, Cucumber (BDD)
- API Testing: Rest Assured, Postman, Bruno
- CI/CD & DevOps: Jenkins, Git, GitHub, Docker, CI/CD Pipelines
- Project Management: Jira, Confluence, Agile/Scrum methodologies
- Cloud Platforms: Microsoft Azure, AWS
- AI/ML Frameworks: TensorFlow, PyTorch, OpenCV
- Databases: MySQL, PostgreSQL
- Operating Systems: Windows, Linux (Ubuntu), macOS, Kali Linux

EXPERIENCE

Delta Air Lines (Delta Technology Hub) — Bengaluru, Karnataka

Senior Software Development Engineer in Test — **Jun 2026 - Present**

- Developed web automation suite for the Delta Air Lines booking platform (delta.com), covering flight booking, seat selection, checkout, and purchase workflows to support reliable releases.
- Developed an automation tool for PNR creation in the Delta staging environment, supporting one-way, round-trip, and multi-city bookings with revenue and miles award options, reducing PNR creation time by 97% (from 30 minutes to 1 minute) and significantly reducing manual QA effort.
- Migrated the web automation framework from Cypress to Playwright, converting and enhancing test scripts to improve reliability, maintainability, and execution performance.
- Automated the Cypress-to-Playwright migration using AWS Kiro AI Agent, converting existing Cypress test cases into a standardized Playwright Page Object Model framework with reusable components, reducing manual migration effort, and improving test maintainability.

- Automated end-to-end Fly Delta mobile application workflows using Appium on iOS and Android, covering flight search, booking, seat selection, checkout, and customer journeys.
- Developed a full-stack automation framework for a virtual assistant chat widget, covering UI, API, and end-to-end workflows, with production and sanity pipelines for daily validation.

INTO Global (INTO University Partnerships) **Bengaluru, Karnataka**

Software Development Engineer in Test **Sep 2024 - Jun 2026**

- Designed and implemented scalable automation frameworks for Declaration Form and Application Fee processes in INTO Payments system, achieved 100% test automation, improved workflow efficiency, and integrated with CI/CD pipelines.
- Built a reusable automation framework to automate Apply Form creation, which reduced processing time by 97% (from 30 minutes to 1 minute per application).
- Implemented automated test reporting, reduced manual effort, and delivered daily interactive reports to Teams.
- Worked on AI-driven document automation using Azure AI Document Intelligence (OCR) and OpenAI APIs to extract structured data from uploaded documents and auto-populate Apply Form fields. Validated end-to-end UI/API workflows by testing more than 1500 documents across multiple formats, improving data accuracy and processing efficiency.
- Optimized payment reliability for INTO Pay and Worldline systems by resolving transaction issues and ensuring seamless system integration.

Amazon **Bengaluru, Karnataka**

Quality Assurance Technical Engineer **May 2022 - Aug 2024**

Career Progression: *Promoted from Software Quality Associate to Quality Assurance Technical Engineer*

- Developed an RTU device testing tool for Fire TV and Amazon devices, reduced end-to-end manual testing time by 80% (from 50 minutes to 10 minutes) through automated app installation, login, performance validation, and reporting.
- Built an automated SIM Ticket Bot, reduced ticket resolution time from 30 minutes to 1 minute per ticket with 99% accuracy.
- Developed and maintained iOS mobile automation using Appium and XCUITest, automating Amazon application workflows including hamburger menu navigation, application features, and Amazon Appstore workflows.
- Performed Android device performance testing by measuring Cool Launch and Warm Launch startup latency, confirming RTU (Ready-to-Use) metrics after first screen load, and conducting memory use and stability testing across repeated launch cycles.
- Designed and implemented a scalable Android automation framework using Appium, Python, and Selenium WebDriver, leveraging ADB platform tools for device management, log capturing, and device-level validation across multiple Android devices.
- Built an automated Test Evidence Capturing Tool, improved QA productivity by 200% (from 8 to 16 apps per day), and reduced manual effort to achieve complete end-to-end test coverage.
- Designed and implemented a self-hosted Amazon Appstore Cloud Storage cleanup tool, reduced app deletion time by 83% (from 60 minutes to 10 minutes) and improved device performance for later testing.

APSRTC **Vizianagaram, Andhra Pradesh**

Mechanical Engineer Quality Inspection **Oct 2017 - Mar 2022**

- Performed quality inspections in engine, unit, and electrical sections to keep performance and safety standards. Found defects and supported root cause analysis to improve equipment reliability.
- Worked with digital tools and web-based automation systems for inspection tracking, reporting, and quality monitoring.

EDUCATION

Miracle Educational Society Group of Institutions, Vizianagaram, Andhra Pradesh

Bachelor of Technology (Mechanical Engineering)

- **Final Project**: Conducted experimental analysis on metal cutting using a water jet machine, optimizing water pressure (PSI) parameters to achieve precision cuts on steel and aluminium.
- **Achievement:** Secured campus placement as a Mechanical Engineer with East India Shipping Company, Mumbai.

HONORS AND AWARDS

- Amazon Appstore Bug Bash Winner (2022): Found and reported critical bugs.
- Amazon Appstore Innovator (2023): process optimization in device performance testing.
- Amazon Appstore ACE (2024): Recognized for contributions to Fire TV device automation.
- Appstore Star Performer (2022-2024): Consistent high performance in automation workflows.
- INTO Shining Star (2024): Developed Application Form automation framework to reduce manual efforts.
- Delta Air Lines Gold Award (2026): Virtual Assistance auto validation.
- Delta Air Lines Silver Award (2026): Delta Air Lines Express Checkout production release.

CERTIFICATIONS

- Generative AI Foundations - UpGrad & Microsoft | Credential ID: Z161sthdGHpG6BUP
- Azure Machine Learning for Cloud Data Science | Credential ID: DJA-B1-5250860
- Microsoft Certified Azure AI Fundamentals | Credential ID: FUN-M-2-3595-991138
- MLOps Essentials Model Development and Integration - LinkedIn
